## **PAGE-REFERENCED GUIDE TO THE DSM-5 UPDATES**

In May, 2013, the American Psychiatric Association published the long-awaited Fifth Edition of its *Diagnostic and Statistical Manual of Mental Disorders (DSM-5)*. In response, Kathleen Berger carefully reviewed her textbook, *Invitation to the Life Span*, Second Edition, adding updates (listed alphabetically below). Additional changes were also made to the Glossary, References sections, and Indexes.

**Note:** this is a guide to changes made to Berger's *Invitation to the Life Span*, Second Edition as a result of the *DSM-5* release, not a guide to what's new in the *DSM-5* itself.

### **ADHD**

**(p. 147)**

Updated coverage of Attention-Deficit/Hyperactivity Disorder as per DSM-5.

### **EATING DISORDERS**

**(pp. 329-330)**

New diagnostic criteria for Anorexia Nervosa and Bulimia Nervosa.

### **AUTISM SPECTRUM DISORDER**

**(pp. 275-276)**

The new DSM-5 describes Autism Spectrum Disorder, with Asperger syndrome no longer considered a separate diagnosis.

### **GENDER DYSPHORIA**

**(p. 360)**

DSM-5 now focuses on an individual's dissatisfaction with their current gender, "gender incongruence," rather than crossgender identification.

### **BEREAVEMENT EXCLUSION**

**(p. 594)**

The new DSM-5 describes Autism Spectrum Disorder, with Asperger syndrome no longer considered a separate diagnosis.

### **NEUROCOGNITIVE DISORDERS**

**(pp. 520-521)**

Introduction of the new term "neurocognitive disorder."

### **DISRUPTIVE MOOD DYSREGULATION DISORDER**

**(p. 273)**

Thorough overview of this new DSM-5 category.

### **REACTIVE ATTACHMENT DISORDER**

**(p. 147)**

Reactive attachment disorder is a highly unusual diagnostic category—evident in young children who have never had the chance to form any attachment, even an insecure one.
