

Discovering GIS and ArcGIS
Chapter 6

Name: _____

Question 6.1: How many road line segments were digitized (and which roads do they represent)?

Question 6.2: How many YSU campus building polygons were digitized and which buildings are they? (Be careful to check one or more of the maps to be sure you have digitized all campus buildings.)

Question 6.3: How many non-YSU campus building polygons were digitized and which buildings do they represent? (Be sure you have found and identified all non-campus buildings.)

Question 6.4: How many parking lot polygons were digitized and which ones were they?

Question 6.5: What is the total length (in miles) of all the digitized sidewalk segments?

Step 6.9:

Print a layout or publish a Web map of final results.
