

PsychInquiry CD

Activity name:	Examine Evidence for Opponent Processes
Student's name:	

Instructions: Complete this worksheet and hand it in to your instructor.

Questions

1. What did you see when you stared at the colored circles in the afterimage activity?

2. Do your results support the opponent process theory?

3. According to the opponent process theory, when you stare at a red patch, and then look at a red apple, will your experience of the redness of the apple be greater or weaker?

- greater
- weaker

Why?
