52 PsychSim 5: Get Smart

PsychSim 5: GET SMART

Name: Section:	

Date: _____

This activity will explore the concept of intelligence and some of the methods of measuring intelligence.

Intelligence and Adaptability

- What does it mean to say that intelligence is a social construct?
- What do two children from dramatically different cultures (a boy working on an arrow and a girl working on a computer) have in common?

Verbal Versus Nonverbal Abilities

• Describe one verbal and one performance subtest of the Wechsler Adult Intelligence Scale (WAIS).

Multiple Intelligences

• Name and describe four of Gardner's eight "intelligences."

Match Sternberg's three "intelligences" with their descriptors:

o Analytic	A. Problem-solving in everyday tasks
o Practical	B. Problem-solving in novel tasks
o Creative	C. Problem-solving in structured, well-defined tasks

Emotional Intelligence

• Define "emotional intelligence."
